MODEL R - CIRCULAR RIB MACHINES The high production and interchangeable diameter design within the Frame Size are only two of the many reasons for the popularity of the Model R line of circular rib machines.

MODEL J - KNITTING MACHINES Model J produces jersey, lacoste, and terry. Some features included on these machines are a preset revolution counter, a Lycra feed system, and a multi-speed positive storage feeding system. Model KDK-Knitting Machines model KDK produces single knit fabric for knit D knit application.

B2E REPLACED BY MODEL SR07026C Computerized, 6-color, coarse cut cylinder rib machines to knit hockey stockings, toques (hats) and leg warmers.

CYLINDERS, DIALS and SINKER RINGS Tompkins manufactures these parts to high quality standards for other machine makes. Selected materials are used to insure accuracy and long life through closely controlled machining and hardening procedures.

Current range of diameters is one through 26 inches.
